

EDGE System Requirements

- **Workstations:**
 - Windows 10 Pro
 - Windows 8 & 8.1 Pro
 - Windows 7 Pro

- **Server:**
 - Windows Server 2008 R2, Windows Server 2012, Windows Server 2016

***Note:** If migrating to a new Server after EDGE has been installed, you **MUST** name the new Server the identical name as the old Server. If you do not name the new Server the identical name as the old Server, your links and document paths within **Edge** will no longer function. If you have any questions, please contact RealWired **PRIOR** to migrating your Server.*

- **Applications:**
 - Microsoft Office 365 Business or Business Premium
 - Microsoft Office 2016 Professional
 - Microsoft Office 2013 Professional
 - Microsoft Office 2010 Professional
 - For EDGE 3.0.2.12 or higher – DataComp Version 7.1.01.25 or higher
 - For EDGE 3.0.2.10 - DataComp Version 7

***Note:** We highly recommend all Edge users have identical versions of Office installed on each PC that will be using Edge.*

We do not support Office 365 Home, Office 365 Personal, Office 365 Centennial (Office 365 thru Windows Store), Office 365 Business Essentials, Office Home & Student, or any version of Office that is not a full desktop installation. For more information, please review [Microsoft's product offerings](#)

- **System Prerequisites:**
 - Microsoft .NET Framework 4.0 full version (all PC's),
 - Windows Installer 4.5 (Server Only)
